# ROYAL MATRONS.

How to Choose Them and Arriving at a Marriageable Age.

The Question of Royal Matrons Being coming very prominent.

Prince Albert Victor Edward the Best Match in Europe.

Nice, February 10, 1890.

It is a rather curious fact, and one that heretofore has escaped notice, that nearly all the heirs to the principal thrones of Europe are just arriving at a marriageable age and consequently the question of royal alliances is becoming one of prominent actuality. The majority of these royal youths were born in 1858 or 1859. Some few are older, as in the case with the eldest son of the Prince of Wales, and there are also several who are very much younger, as, for instance the crown prince of Germany, who is six years old, and the king of Spain, who is only two. But the future emperors and kings are hereditary grand dukes of Europe are each, as a rule, nearing their twentieth or twenty-first birthday, and are consequently at an age when royal gentlemen are supposed to get married.

The greatest match of them all is probably Prince Albert Victor Edward, eldest son of the Prince of Wales, who has passed, by some years, the usual limit of royal celibacy, as he is just twenty-five. The latter, by the way, was married before completing his twenty-second year. His early wedlock is said to have been due to the influence of his sister, the crown princess of Prussia, who had been charmed by the grace of the Princess Alexandra of Denmark, and desired to secure that most exquisite of royal maidens for her brother before her beauty had won for her some other brilliant alliance.

It is rather noticeable that none of the children of the Prince of Wales are married or even engaged, though they are all arrived at marriageable ages. Prince George is twenty-three, Princess Louise is twenty-two, her next sister Victoria is past twenty, and the youngest of all, the Princess Maud, is over nineteen.

Prince Albert Victor, fondly nicknamed "Cob and Cuz" by his irreverent future subjects, is not a very fascinating young man. He has a dull, heavy countenance, and in society is said not to be his boss. It will not be an easy matter for him to choose a wife. A cause in the royal marriage act of Great Britain forbids the union of the heir to the throne with a Roman Catholic, a fact that greatly narrows the possibilities for his selection. The young German princesses, Clementine, daughter of the Count de Paris, and her cousin the Princess Marguerite de Chartres, and also the Princess Clementine of Belgium, and her cousins the daughters of the Count de Flandres (brother to the present king and heir to the throne) are all removed from competition on account of their religion. So he may have to choose the future queen of England from amongst his own cousins. Of these there are several of a suitable age, including the Princess Margaret of Prussia and the Princess Alex of Saxe-Jarmstadt. Neither of these young ladies is quite seventeen, and the latter is said to be remarkably pretty. Or, if he decides to postpone his wedding for a few years, he might find a bride in the Grand Duchess Xenia, eldest daughter of the czar of Russia, who is nearly fourteen. But in all respects the most suitable match for him would seem to be with Princess Victoria of Denmark, eldest daughter of the princess of Cambridge, and the acknowledged beauty of the younger generation of the royal family of England. She is his cousin in the third degree only, is an English princess by birth and breeding, and is just of the right age, being twenty-one. Moreover, it is whispered that the prince is very much in love with this charming young lady, and that only the stern opposition of his imperial grandmother, Queen Victoria, prevents their betrothal.

The next great match in Europe, indeed, one of equal brilliancy with the future king of England, is the czarowitch, who is now twenty years of age. He is of a fragile constitution, so probably will not marry for some years to come.

The Prince Royal of Italy, Victor Emmanuel, Prince of Naples, is a year younger than the heir to the throne of Russia, but as he is only child, and his father is by no means in vigorous health, the question of his marriage is a really seriously mooted with a view to settling the succession to the throne. The Princess Clementine of Belgium was at one time proposed as the future queen of Italy, but the pope forbade the match, and the parents of the young lady being devout Catholics, obeyed the pope. The Princess Eleanore, second daughter of the Count de Paris, would probably have been chosen, but the marriage of the Duke of Aosta, uncle to the Prince of Naples, to the Princess Cecilia Bonaparte, caused the Count de Paris to break off the negotiations, as he declined to allow his daughter to ally herself so closely with one of the crowned heads of Europe. The young Prince of Naples is a handsome young man, with a grave, intellectual

countenance. He has grown the delicate of health from which he suffered in his boyhood, and is said to be very intelligent and to possess much strength of character. He will most certainly be compelled to choose a wife from among the Protestant princesses of Europe; and, indeed, his betrothal to the Princess Marguerite, youngest daughter of the late Emperor Frederick of Germany, is considered highly probable. She will be seventeen next April, and is the goddaughter and namesake of his own mother, Queen Margherita. In fact, the heir to the Italian throne has not much scope for choice in matrimony. The hostile feeling existing between Austria and Italy does not admit the infinite series of Austrian princesses and grand duchesses. His religion prevents him from choosing an English princess, and the interference of the pope hinders him from contracting a Belgian alliance. He has not even the advantage of marrying a young girl, as a last resource, as there is not a single unmarried princess in the royal family of Italy. The Prince Regent of Bavaria has, it is true, two granddaughters of a suitable age, the Princesses Adelheid and Marie, the former being just eighteen and the latter a little over sixteen, but the terrible form of insanity with which the royal family of Bavaria is afflicted will doubtless make it difficult for the younger members of that family to form suitable alliances.

The eldest brother of these young princes, Prince Rupprecht, son of the Bavarian Crown Prince Louis and future heir of the throne, is a son of the marriageable royal youths of Europe. He was thirteen last May, and is a very fast young gentleman, indeed, his escapades having on more than one occasion caused an open scandal. He must marry a Catholic, so an alliance is talked of for him with the Princess, Countess of Belgium, daughter of the Count de Flandres, who is a little over sixteen. Or he may possibly select the Archduchess Marguerite, niece to the emperor of Austria (she is the daughter of that sovereign's eldest brother, the Archduke Charles Louis) and she is one year the junior of Prince Rupprecht.

Prince Baucoulin of Belgium, son of the Count de Flandres, nephew of the present king, and heir to the Belgian throne, will be twenty next June. The most obvious alliance for him would be with his cousin Clementine, as that marriage would tend to consolidate the present king and queen for their act of male issue by making of their youngest daughter the future queen of the Belgians. But that young princess (who has a ready-made betrothal by rumor to the marriageable prince of Europe) may possibly marry the crown prince of Italy after a while, as within the last few days a report of her engagement to that young gentleman was once more current. In fact, it is now said that the wedding will take place next March. So these rumors some probability has been given by the fact that the photographer on the title of the royal family has been summoned to Belgium to take the princess's portrait, and Queen Henriette is noted for never permitting any of her daughters to sit for a photograph before being engaged to be married.

Prince Frederick Augustus of Saxony, eldest son of Prince George, the brother of the king of Saxony and heir to the throne, is twenty-three, and his brother, Prince Jean, is nearly twenty. As heirs to the royal family of Saxony does not approve of early marriages, the Princesses Matie and Marie, are twenty-five and twenty respectively. Prince Frederick Augustus, heir to the principality of Waldeck-Tyrmont, and brother to the present queen of Saxony, is also twenty-five. His youngest sister, the Princess Elizabeth, who is, like him, unmarried, is just fifteen, and as the ladies of the family are very charming, she will probably espouse sooner or later one of the young leading princes of Europe. There is one drawback to the formation of brilliant alliances by the family; it is one of the poorest amongst the reigning houses of Europe.

The heir to the Grand Duchy of Baden, Prince Louis IV, and the famed Princess Alice of England, was twenty on the 5th of November last. His only unmarried sister, the Princess Alix, will be seventeen next June, and is said to be one of the loveliest of the unmarried royal girls of Europe, resembling in many points that superb beauty, her eldest sister, the Grand Duchess Sergius of Russia.

The eldest son of the Crown Prince of Denmark, and grandson to the present king, Prince Christian, is a little over eighteen, and is consequently "over young to marry yet."

There are two marriageable young princesses in the royal family of Sweden, Princess Charles, aged twenty-eight, and Prince Eugene, who is twenty-three. The heir to the throne, Prince Gustave, was married eight years ago to the Princess Victoria Baden, niece to the late Emperor Frederick of Germany. The Duke of Braganza, crown prince of Portugal, is the husband of Princess Amelia of Orleans, eldest daughter of the Count de Paris, and is the father of a fine boy, the Duke de Beira. The younger son of the king of Portugal, Prince Alfonso, is reported to be on the look-out for a wife. He is over twenty-three, and as he is a younger son he may possibly be compelled to select an heiress from amongst the young royal maidens of Europe, as the reigning family of Portugal is an extensive one.

The Duke of Sparta, crown prince of Greece, will marry in the spring the Princess Sophia of Prussia, and as sister, Alexandra, is engaged to the Grand Duke Paul of Russia. His younger brother, Prince George, who is not quite twenty-one, was reported at one time to be a suitor for the hand of the Princess Eleanore of Orleans; but the present emperor of Germany interfered and put a stop to the negotiations, as he could not endure that his sister should have a French princess for a sister-in-law.

The two eldest sons of the Princess Mary of Cambridge, Duchess of Teck, Prince Alois and Prince Francis, are respectively twenty and nineteen, and are very pleasant, unassuming young gentlemen.

But the lower of the foot of young unmarried princesses is George, second son of the Prince of Wales, who is a handsome, sprightly, lively young man of twenty-three, possessing all his father's gaiety of spirits, genial manners, and genuine good nature. He is the most popular member of the younger generation of the royal family of England. The eldest son of the Count de Paris, Prince Philip, is nearly twenty, and Prince Henri, the eldest son of the Duke de Chartres, is over twenty-one, and both are single. So, too, are the Bonaparte princesses, sons of Prince Jerome Napoleon, both of whom are quite old enough to be married. Prince Victor being twenty-six and Prince Louis twenty-four. Their cousin, Prince Emmanuel, eldest son of the Duke of Aosta, is just twenty.

So, evidently, there is no lack of young men to marry in the royal families of Europe; but where are they to go? For wives? There are comparatively few of the sovereigns of Europe who have daughters of a marriageable age. The emperor of Austria's youngest daughter, the Archduchess Valeria, is single, but she is in very delicate health and is afflicted with epilepsy. The reigning families of Portugal and of Italy possess no daughters. The little Spanish Infantas and the crown princess of Holland are mere children. The youngest and only unmarried daughter of the Duke de Nemours, the Princess Eleanore, may be considered out of the question, as she is over thirty-one. The Princess Mary of Cambridge, sister to the Duke of Cumberland, is nearly thirty. Old maids are not common in royal families, and even when marriage is long delayed, as was the case with the Princess Elizabeth of Saxe-Weimar, who did not marry till she was thirty, an alliance is generally arranged for the damsel at some period of her existence.

It is a pity that these royal boys and girls cannot be brought together in some vast hotel on neutral territory, there to be left for the purpose of becoming acquainted, so that each young prince would have a chance to woo and win the princess of his choice. But such an experiment were ever tried the result would be "confusion worse confounded," without a doubt. Catholics would make choice of Protestants, Bonapartes would woo Bonapartes, German princes would fall in love with French princesses, and the whole map of Europe would be in danger of disintegration through the formation of entangling and unprincipled alliances. Under the actual systematic actions of a young royal girl is never consulted. It is scarcely possible that they should be, since she is almost invariably called upon to marry a man whom she has never seen. Yet it is a great mistake for a princess to marry beneath her station, as exemplified in the union of the Princess Louise and the Marquis of Lorne. The inferiority of the husband's position to that of his wife in that instance causes him to be continually placed in a degrading and humiliating position. Kings and princes make very bad husbands as a rule, but it is better for a royal maiden to put up with the crosses and vagaries of the bridegroom of her own rank than to link herself with a social inferior, who will be frequently mortified and exasperated by the display of his pride.

Theodore Stanton.

The Colorado Springs "foot ball" team were rather disappointed in their hopes for a fine day for the game with the Denver University team Friday. The game was called at 2 o'clock with a strong wind blowing, and before the close a great part of the audience felt, having become thoroughly chilled. The result of the game was seven to four in favor of the University team. At the start there was considerable hand-picking, before a point was made, but the University men made the first point with a goal from the field. Goodard, of the Springs, made the most brilliant play of the day, being the "back" almost from within the visitors' goal, and carrying it in the hands of the fact and securing a touch-down. No goal was kicked from this touch-down. In the second half the University raised their score to seven by a goal and a touch-down. The teams were very well matched, the Springs being having the advantage in weight. The playing of Saxe, of the University team, was the conspicuous feature of the previous game. Greenwood, of the college team, played with a strong wind blowing, and before the close a great part of the audience felt, having become thoroughly chilled. The result of the game was seven to four in favor of the University team. At the start there was considerable hand-picking, before a point was made, but the University men made the first point with a goal from the field. Goodard, of the Springs, made the most brilliant play of the day, being the "back" almost from within the visitors' goal, and carrying it in the hands of the fact and securing a touch-down. No goal was kicked from this touch-down. In the second half the University raised their score to seven by a goal and a touch-down. The teams were very well matched, the Springs being having the advantage in weight. The playing of Saxe, of the University team, was the conspicuous feature of the previous game. Goodard, of the Springs, made the most brilliant play of the day, being the "back" almost from within the visitors' goal, and carrying it in the hands of the fact and securing a touch-down. No goal was kicked from this touch-down. In the second half the University raised their score to seven by a goal and a touch-down. The teams were very well matched, the Springs being having the advantage in weight. The playing of Saxe, of the University team, was the conspicuous feature of the previous game. Greenwood, of the college team, played with a strong wind blowing, and before the close a great part of the audience felt, having become thoroughly chilled. The result of the game was seven to four in favor of the University team. At the start there was considerable hand-picking, before a point was made, but the University men made the first point with a goal from the field. Goodard, of the Springs, made the most brilliant play of the day, being the "back" almost from within the visitors' goal, and carrying it in the hands of the fact and securing a touch-down. No goal was kicked from this touch-down. In the second half the University raised their score to seven by a goal and a touch-down. # FOUNTAIN RIPPLES.

**FOUNTAIN, February 27.**  
Mr. DeGraff lost nine head of fine cattle last week by the Santa Fe and the company immediately advised the matter with satisfaction.

Dr. B. Moore returned Friday from an extensive trip through Utah and the west. He does not picture "Life among the Mormons" in such glowing terms as are generally employed. We understand that he failed to find a location suitable in every respect so has concluded to remain here for a time yet.

Quite a number of visiting ministers are here in attendance upon the projected meeting now in progress in the A. B. church. Considerable interest is being awakened and we hope great good may result from the efforts which are being put forth with so much earnestness and zeal.

Through the efforts of the "Disaster" the citizens of Fountain met Monday evening for the purpose of awakening an interest in the reservoir question which is at present agitating the minds of western ranchmen. The meeting proceeded to business by electing A. B. Ames as chairman and V. B. House secretary.

Dr. B. stated the object of the meeting to be for the purpose of appointing a committee to confer with representatives from other sections of the county and if possible arrange for a joint meeting previous to the western visit of the congressional committee. Mr. B. gave a short sketch of work done four years ago by James H. Carson and Finley. After considerable preliminary work several natural reservoirs of considerable capacity were located.

From a lack of the necessary information the matter was dropped now that the question is being agitated anew, and the government has become interested. It will be easier to work the project in a local point of view. These natural basins, with but slight expense, could be used in storage of the vast amount of water which goes to waste during the eight months of the year in which it is not used. Again the continued seepage during the winter months would keep the water in the reservoirs and the water needed during summer months would be a much less quantity and just at the time when the supply is least. The time has come when we must store the water in winter for use in summer. Every body admits this fact. The only way to do a thing is to do it and we are going to improve the start made in this direction and if co-operation can be secured it will materially further the scheme, and secure more prompt action.

If no general movement can be inaugurated then let the people of Fountain take hold of the matter with a vim and decision that will succeed. The committee appointed consisted of Dr. B. A. B. Ames and Dr. B. Baxter, who will consult with others and if it is thought practicable a meeting will be called for the purpose above mentioned. We hope those interested will take hold of the scheme and see what can be done in this direction.

**ELBERT.**  
Oat-bloom showed Wednesday. Just before noon it began and continued, "at" for four or five hours. Not in this gust as it usually does in Colorado, but in great calms, so that a traveler on the highways was pretty effectually snowed out after being out a few minutes. It came straight down, not with the piercing winds driving the snow flakes through the waisters, but quietly, gently whitening the earth like the apple blossoms when the tree is shaken by a zephyr in the sweet June time. But nobody seemed to mind. In fact the stout men wore very broad smiles when they thought of the fine grass it would cause to grow in the spring. The contractors who have digging to do were figuring how much they would be paid by the softening of the earth; the agriculturist and average good citizen were congratulating each other on account of a plentiful supply of water assured them during the coming year. The business men hurried along to bank or postoffice through the falling flakes, the school boys and girls roared big balls of snow or wasted one another's faces with it, while bigger boys pecked each other and every body else with it at the afternoon. By four or five inches had fallen and later in the evening it began again.

The cow-boy excursion to Washington passed through the city Wednesday morning, arriving about 11 o'clock over the Rock Island and leaving at 12. The Dodge City pack which heads the excursion, played a number of pieces at the depot. There were about 50 on the train. Only a few joined the party at this point.

The members of the G. A. R. of this city and Colorado City Wednesday issued a circular containing the resolutions adopted by representatives of their posts on Tuesday evening regarding the matter of locating the soldiers' home in the San Luis valley. A copy of the circular will be effect on the desk of every member of the legislature this morning.

There was an interesting athletic exhibition at Armory hall Wednesday night some of the most prominent athletes of the country participated. The exhibition was under the management of Mr. Jack Davis. There was not a very large audience present. The principal features of the evening were sparring matches between Jack Davis and James McCarley and between Dr. Smith and Jack

Foggarty. The audience assembled principally to see Smith, who is a young Englishman of about 25 years of age, weighing 155 pounds and of excellent proportions. The entertainment was much more interesting than the one given by the John B. Sullivan company three years ago.

Dr. B. P. D. Adams and wife, Mr. Edward Adams and Mr. B. W. Steele left on Tuesday morning for Denver, Texas and St. W. train for an extended tour in Texas.

Stecson's Big Double End Combs Cabin company is booked to appear at the opera house next Monday evening. This company comes direct from the east and is said to be the largest and strongest Double End Combs combination now traveling. They have a number of new features.

The football team expects to play a return game with the University team in Denver on March 9th. The boys want revenge.

The Boston Land company has filed its certificate of sale up stock.

Mrs. M. McCoombs of Wernersday's Rock is en route for Pittsburgh, Pennsylvania.

A marriage license was issued Wednesday to A. J. Barney and Miss Abbie B. Coe, both of Manitou.

Mr. Charles Butler Wednesday received a handsome specimen of the American goat-horned eagle. It was caught in a coyote trap and measures seven feet and two inches from tip to tip.

The people from the city who were in attendance at the March 1st Gras in Pueblo on Tuesday evening were very much surprised when they learned that King Rex was represented by a citizen of Colorado Springs. Dr. E. George Wals was the gentleman chosen for that distinction.

A prominent contractor stated to a GAZETTE representative Wednesday that there would be enough work in this vicinity extending lines of water pipe during the summer to more than double what the city will do.

Mrs. Annie J. Messer, the well-known apostle of dress reform in women, will lecture here on April 30th under the auspices of the Woman's Exchange. Mrs. Messer is not one of the stereotyped masculine women lecturers who imagine they have a mission and bore audiences by the hour with their facts. She is a charming woman who comes with an interesting story to tell. She believes that much of the ill-health from which women suffer is due to the style of dress which is now in vogue, and she herself is a striking practical argument in favor of her theories. Mrs. Messer shows at each lecture the entire set of undergarments and dresses for occasions from the simplest to the most elaborate. Her practical dresses embrace street, house, and rainy-day costumes, showing how they may be made at once convenient and graceful, while the more elaborate reception, evening and evening costumes are exquisite and picturesque, and prove in themselves that the elegance of attire may secure comfort while serving the gods of beauty.

Dr. E. George Wals, the Colorado Springs citizen who so successfully acted the part of Rex, king of the Pueblo carnival, in the early part of the week, was born in Queen Anne's county, Maryland; was educated at Washington university, and for years was a practicing physician in Baltimore. He came to Colorado Springs the 23d of June, 1887, and located on a ranch about eight miles north-east of the city, where he has built a house and made improvements costing over \$10,000. He has a large number of horses and a fine collection of birds and animals. His wife's name is Mary, and she has come to stay.

Mrs. A. J. Dana yesterday received a letter from Mr. G. W. Steadman of Yank City, Ohio, the father of the man who died so mysteriously in the city last about two weeks ago. The father seemed greatly surprised to hear that the young man had died without means, as he believed him to be in Pueblo and doing well. He stated that his son had written recently that he had not been well of late. He says that if his son's trunk and other effects are sent to him he will pay the expenses incurred in burying him.

The Davis-Smith combination of athletes, which gave a performance in the armory hall on Wednesday evening, expects to leave shortly for a tour of the larger towns of the state. When they return an exhibition will probably be given in the opera house.

The annual statement of the Colorado Springs and Manitou Street Car company filed in the county clerk's office yesterday shows that the company's stock of \$100,000 is paid in full, and that the floating debt is \$5,375.75.

Mr. James Casagay issues another challenge to Dr. Sewell in this morning's GAZETTE, and has posted \$25 forfeit to make his offer good.

Captain E. P. Wilcox, of Portage county, Ohio, is among the late comers to the city. He can find a suitable location here, probably remain in the city and engage in business.

The members of the New York Polo club who have been in the city recently purchasing ponies, have secured a pair of the animals suitable for that purpose, and they will be shipped to that city shortly.

Mrs. Susan M. Donovan, through her attorney, Judge Harrison, Wednesday set an injunction suit in the district court restraining the city from taking any additional water from the Fountain creek, and from employing additional sewer matter into the same creek. The complaint alleges in the first place that Mrs. Donovan for four years has owned and occupied the south end of section 28, township 24, south range 66 west, for farming purposes. That in 1832 or 1833 a ditch to carry the water from the creek was dug, and that the water was taken from the Fountain creek, and that it has been used ever since; that in the year 1888 the city of Colorado Springs by means of its water works and irrigation ditches has taken from this creek, and used for such purposes the waters of said creek; that her ditch did not have a sufficient supply; that the city is about to take steps to further reduce the quantity of water in the stream. She therefore prays that a preliminary injunction be put upon the city from using the water; that the final hearing of the case be put upon the city; that it be decreed that in 1888 the city built a system of sewers which empty into the creek, which renders its waters corrupt, unwholesome and unfit for use and laden with the germs of disease. She asks that they be enjoined from emptying more matter in the creek. In 1901 cases she claims damage to the amount of \$500.

The certificate of incorporation of the Colorado Zote and Sanitarium company was filed in the county clerk's office Wednesday by W. Finley Thompson, Jacob M. Murphy and William A. Macond. The object of the company is to construct and operate a hotel and sanitarium at Palmer Lake, and also to buy, rent and sell cottages. The capital stock is \$100,000, divided into 1000 shares of \$100 each. The company is incorporated for a term of twenty years, and is to have its principal offices at Palmer Lake and a branch office in Denver.

Walter Weigert & Sons' coal wagon was being unloaded on the corner of St. Tuesday noon, the horses started to run, and when near the corner of Tejon street, they turned south on Tejon street and dashed into the big glass of Star's hardware store. The large glass in the south window was completely demolished, but, strange to say, the horses were not injured. The window was worth about \$75, but was insured.

Henry P. Moon of Missoula has furnished the following report of the weather for the week ending February 26th, 1890: Highest temperature, 55 on the 21st; lowest temperature, 9 on the 26th; weekly mean temperature, 38. Prevailing direction of the wind, south.

Mr. James Casagay is recently in need to his stable three very valuable horses which he purchased in Denver. One of them is the "Dumbition" gelding, Frank Leslie, which stands No. 68 in Gotting's catalogue.

**MARSH.**  
CALVERT-MORRIS—At the Baptist parsonage, February 14th, by the Rev. Richard Morris, Wm. W. Calvert and Elizabeth A. Morris, both of Denver.

HOPKINS-HOPKINS—By the Rev. Richard Hopkins, on February 25th, both of this city.

HOPKINS-HOPKINS—By the Rev. Richard Hopkins, on February 25th, both of this city.

**BUSINESS LOCALS.**  
Ten cents per line for first insertion; five cents per line for each subsequent insertion. Advertisements to go in every other day, or on certain days of the week, can be put on for one cent per line.

Plano, Oregon, Sewing Machine, for sale, for rent and repair at Alton's.

Dr. S. H. and J. L. Birney, Physicians and Surgeons. Special attention to diseases of the lungs and diseases of women. Consultation room recently furnished and private. Rooms 1339 Arapahoe St., Denver, Colo. o-4

**D'AMONDS, and Diamond-Setting at Ashby's.**

**LAND SALON.**  
Selling 260 Acre, etc.

**NO. P. ROEMAN.**  
Proprietor.

**THE S. Y. 255 G. 232**  
issued March 2nd, 1890. This is an endorsement of the value of the property of the S. Y. 255 G. 232. We can do this for you and furnish you with all the necessary and unnecessary expenses to make, well, dance, sleep, eat, drink, and work, go to church, or stay at home, and in various ways, styles and quantities, just figure out what is required to go to these things and you can make a large profit. The value of the S. Y. 255 G. 232, which will be sent upon receipt of 10 cents to pay postage.
